

# Spa Winterizing/Inspection Sign Up Form

Please fill out this form and mail, email, or fax it back to us with your preferred date so we can put you on the schedule as soon as possible. Please note that we will not be performing this service on Saturdays. Most spas are set up, so you do not have to be home while we are doing the work. Due to weather considerations, all inspections or closings should be done prior to December 6th.

We cannot winterize spas when the temperature is below freezing.

Name \_\_\_\_\_ Home Phone \_\_\_\_\_

Address \_\_\_\_\_ Work/Cell# \_\_\_\_\_

# 2022 Spa Winterizing/Inspection

## When was the last time your spa was inspected by a professional?

Now that the freezing temperatures of winter are a few months away, it might be wise to have us inspect your hot tub investment. We can often find small problems before they turn into a larger one. October/November is also a good time to drain, clean and refill the spa so you don't have to in December, January, or February. We can do this and the spa inspection at the same time if you wish.

We highly recommend the Serum Total Cleanse to help free and rid the plumbing lines of biofilm and bacteria prior to draining or winterization of your spa. Stop by the store or call us for details.

### Option #1 - Spa Inspection: \$150.00

We will perform routine maintenance, check water chemistry, check motors and pump seals. We will inspect the heater and ozonator output (average ozonator sanitizing life is 3-5 years). Clean or change the filters, check equipment bay for plumbing leaks, check jet and diverter valve operation. Inspect the condition of your cover and test all controls and equipment functions. Any repair that is necessary will be billed on a time and materials basis and will be discussed with you prior to the repair if you wish.

### Option #2 - Drain, Clean, and Fill plus spa inspection: \$295.00

(Extra charge for spas over 8' and low hose water pressure)

We will perform the above listed spa inspection **plus** drain the spa water, clean the spa's interior, clean and treat the spa cover, refill and start up the spa. We will add Stain and Scale and the first dose of PH reducer along with a new Nature 2 Mineral Purifier unit for spas that use it or the new @Ease Smartchlor sanitizing system (Nature 2 and @Ease are additional cost). You will need to check and adjust the water chemistry as usual or bring us a water sample, so we can help you balance chemistry once the water heats up.

***For those of you who do not use the spa during the winter***  
***Avoid costly mistakes by having our pros winterize your spa for you. We have the expertise and equipment to close your spa for the winter properly. We guarantee it!***

### Option #3 - Spa Winterization: \$355.00 w/liner and Antifreeze

After Dec. 6th is \$435.00

We will drain the water, blow out all plumbing lines and pumps, disconnect the unions, clean your filters, winterize the equipment, add anti-freeze where needed. We line the spa shell with a heavy-duty plastic liner to prevent rain and snow from harming the spa over the winter and add antifreeze if needed.

Spas over 8': add \$100

Spas with more than 3 pumps: add \$50

Any materials used are not included in the above pricing and will be billed out accordingly.

**A zone 2 travel charge may be assessed to the above prices**
