2025 Spa Winterization/Inspection

When was the last time your spa was inspected by a professional?

Now that the freezing temperatures of winter are just a few months away, it might be wise to have us inspect your hot tub investment. We can often find small problems before they turn into a larger one. October/November is also a good time to Drain, Clean, and Refill the spa so you don't have to in December, January, or February. We can do this and the spa inspection at the same time if you wish.

We highly recommend using **Serum Total Cleanse** to help free and rid the plumbing lines of biofilm and bacteria prior to draining for winterization. Stop by the store or call us for details!

Option #1- Spa Inspection: \$195.00

We will perform routine maintenance, check water chemistry, and check motors and pump seals. We will inspect the heater and ozonator output (average ozonator sanitizing life is 3-5 years), clean or change the filters, check equipment bay for plumbing leaks, and check jet and diverter valve operation. Inspect the condition of your cover and test all controls and equipment functions. Any repair that is necessary will be billed on a time and materials basis and will be discussed with you prior to the repair.

Option #2- Drain Clean and Fill plus Spa Inspection: \$395.00

(Extra charge for spas over 8' and low hose pressure)

We will perform the above listed spa inspection plus add **Serum Total Cleanse** to clean the plumbing, then drain the spa, clean the interior, clean and treat the spa cover, refill and start up the spa. We will add **Sirona Prevent** and the first dose of pH reducer, along with a new *Sirona Spa Mineral Sanitizer* unit for spas that use them. We will also replace the @Ease Smartchlor sanitizing system for spas that use them. These products are an additional cost. You will need to check and adjust the water chemistry as usual or bring us a water sample so we can help you balance chemistry once the water heats to the desired set temperature.

For those of you who do not use the spa during the winter

Option #3- Spa Winterization: \$425.00 w/ liner and anti-freeze if needed

We will drain the water, blow out all plumbing lines and pumps, disconnect the unions, clean your filters, winterize the equipment, and add anti-freeze wherever needed. We line the spa shell with a heavy-duty plastic liner to prevent rain and snow from harming the spa over the winter.

Spas over 8': add \$100.00

Spas with 3 or more jet pumps: add \$100

Swim spas: \$625.00-995.00 (swim spas are not lined with plastic)

Swim spas that are drained prior to arrival may have reduced rates of \$100-200

SWIM SPAS- Any anti-freeze or plastic used will be charged extra

AQUA POOL & SPA PROS

2060 E. Grand Ave, Lindenhurst, IL 60046 * 847-265-5280 * www.aquapoolspapros.com

Spa Winterizing/Inspection Form

Please fill out this form and mail, email or fax it back to us with your preferred date so we can put you on the schedule as soon as possible. Please note that we will not be performing this service on Saturdays. Most spas are set up, so you do not have to be home while we are doing the work. Due to weather conditions, all inspections or closings should be done prior to December 1st.

We cannot winterize spas when the temperature is below freezing
